

Welcome To Your New Campus Experience!

We are always doing our best to ensure a sustainable and safe environment for our community and students. With that being said, we are happy to announce that we are going cashless!

In partnership with Spare, the new system uses contactless technology connected to a mobile application, through which you can recharge your account, make purchases on campus and more!

Cashless Payment

- No more losing or forgetting their allowance
- No physical contact = more hygienic
- Faster payment, save their time during the break

Better Nutrition, More Responsibility

- Monitor their daily intake & meals
- Set daily, weekly or monthly limits, teach financial responsibility
- Teach your child healthy eating habits, keep their allergies under control

Getting Started

Download the app **Spare - Schools Made Smarter**

Create your parent account

Activate your child's wristband /ID card

Tap on "add a family member"

If you have more children, you can add more through your profile page.

Charge your account

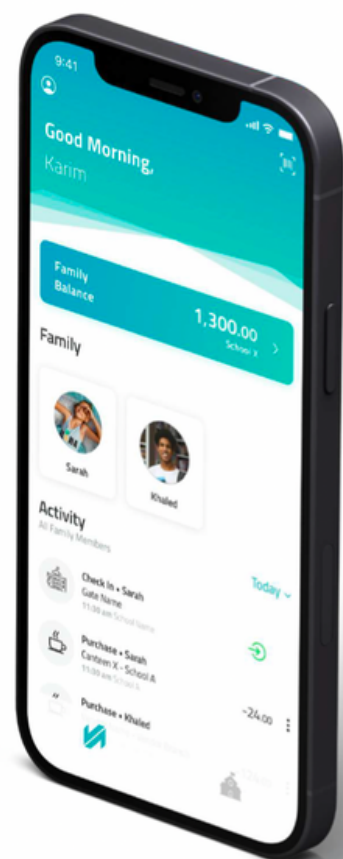

Before your child can use the account, you need to charge your balance.

You can do this in-app using your debit/credit card.

That's it!

Send your child to school with their wristband, and never worry about their allowance again.

Tips & Tricks

- You can set **spending limits, allergies & more** by going your child's page and tapping on the settings icon.
- If you have more than one child, no need to recharge more than once. They all share the same **family balance**.
- **Your spouse can also access your family account.** To do this, simply log in on their phone using the same phone number.
